RE: **Pacific City
Wastewater Treatment Plant Upgrade, Addendum #3 to the (PER)**

Dear Mr. Owen,

Rural Development (RD) has reviewed addendum #3 to the Preliminary Engineering Report dated November 2015 by Parametrix. The addendum modified selected portions of the original PER addressing population and wastewater flows and loads as it relates to the overall design. The intent of addendum #3 is to specifically address the method used to assess future flows and loads by the number of current and future sewer service connections, peak flows, organic and solids loading.

Based on the information above, Rural Development agrees with the project engineer and their design is modest in design, cost and size.

Please don't hesitate to call me with any questions you may have.
I can be reached at 503-414-3368.

Michael Beyer
State Engineer

cc: Sam Goldstein, CP Program Director, Rural Development, Portland
Drew Davis, CP Specialist, Portland
Tom Neilson, Parametrix
